

# Bothered by a low plane over Brockenhurst?

Report it in under two minutes. Every complaint is logged, and it counts.

## 1. WebTrak (the airport's own official record)

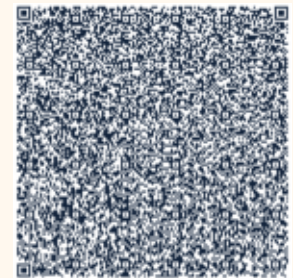

- 1 Scan the code, or go to **webtrak.emsbk.com/boh**
- 2 Scroll the time bar back to **when the plane went over**
- 3 Tap the plane: it shows you the **flight and its height**
- 4 Tap 'Report' and send it

*You do NOT need the flight number, WebTrak finds the plane for you.*

## 2. Or send a ready-made email

Scan the code to open an email already written for you. Just add the date, time and one line about what you heard, then press send.

Prefer to type it yourself? [environment@bournemouthairport.com](mailto:environment@bournemouthairport.com)

*Only got the date and time? Send those to our group, we can find the flight.*

## Why bother?

The airport must log and report every complaint to its committee and the regulator. Numbers get noticed. Report EVERY disturbance, not just the worst night. Complain in your own name: many people each complaining beats one person complaining often.
